

- It detects both change in temperature and fires giving off smoke that contains visible particles(burning electrical cables, etc.)
 - Detection area: approximately 100m²
 - Power supply: 1 x 3V lithium battery
 - Battery life: typically 8 years
 - LED signalling
 - Detection and transmission of "dirty room" default signal
 - Cleaning interval: typically 4 years
 - Built-in protection against opening
 - Dimensions: diameter 102mm x height 46mm
 - Low battery detection (1 week's operating time left)
 - Supervision every 1h
